STRETCHABLE UPPER

Super elastic and stretchable textile for improved comfort and fit.

ELECTROSTATIC DISCHARGE (ESD)

ESD provides the controlled discharge of electrostatic energy that can damage electronic components and avoids risks of ignition resulting from electrostatic charges. Volume resistance between 100 KiloOhm and 35 MegaOhm.

COOLMAX® LINING

Coolmax® technology was originally developed for athletes. The material transports moisture and sweat, so that the body stays dry. We found it extremely suitable for people who work hard for hours every day too.

REMOVABLE INSOLE

Renew your insole at a regular base or use your own orthopedic insoles for a higher comfort.
